modular
range**

“Eye-Catchers”

New developments from Kinderland's World of Ideas

The Modulus principle...

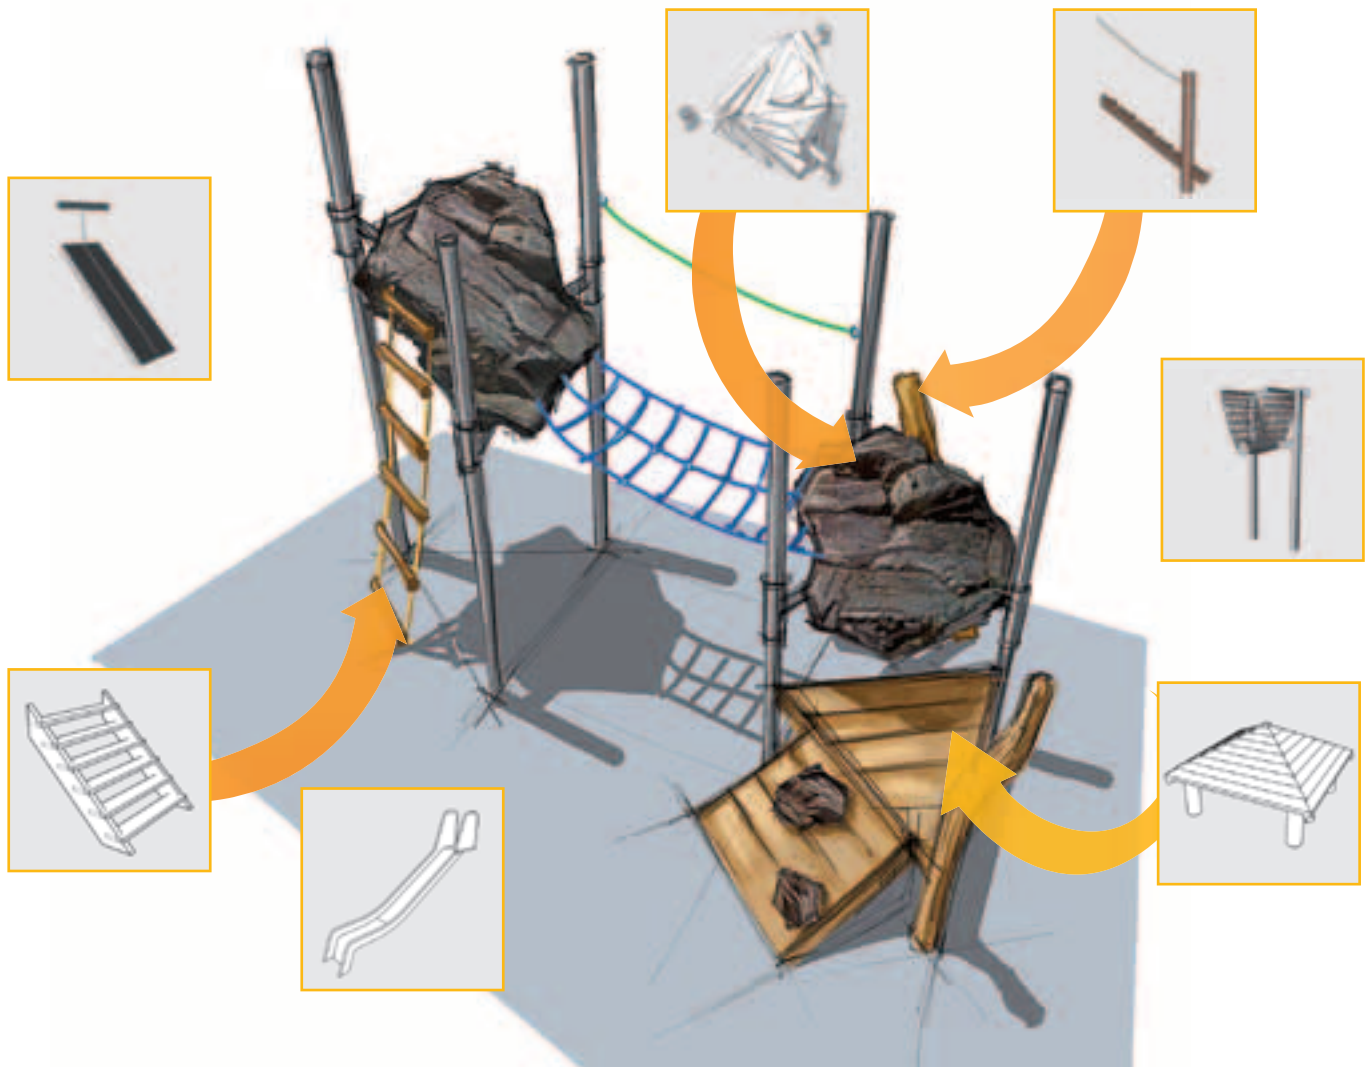

Haltern, Rock climbing combination

A modular system to play with!

Rocks, suspension bridges, slides, climbing walls – the **Moduludus** system offers a wide variety of possibilities. The various modules are carefully selected and can be combined in many different settings, offering a safe and exciting play area. By using different materials, colours and forms, a completely new look can be created in every situation. In addition new modules are continually being created by our design team to form new combinations.

Haltern, Rock climbing combination

... flexibility in combining.

A large variety of playful ideas...

Bochum, Halbachstraße

Cologne, Vitalishöfe

Beachresort Markgrafenhöhe

Gelsenkirchen, Schulstraße

Colour mixer

Gießen, Familycentre Schlangenzahl

Koblenz, Buga

...from traditional to innovative.

Reutlingen, Nürtingerhofsstraße

Gelsenkirchen, Irmgardstraße

Berlin, Alberichstraße

Papenburg LGS, Aulonetic

Hattingen, Henrichshütte

Rewards, just a step away!

That's fun... creating kinetic energy with instant results! Just by stepping onto the padle, enough energy is created to activate an audio file. Cables and other connections are no longer required...

And fantastic places...

Children prefer to play in exiting places!

"Keep out – construction site!" To most children, an invitation to play! Construction sites, enchanted houses or extraordinary tree houses – we have a new range of imaginative play areas that children will love to play and explore. Uniquely themed play worlds, developed by experience educationalist and artists, no one structure is the same. Allow yourself to be surprised too...
