"Hausener steel swing"

Always moving

Our play elements activate the play sense, improve the sense of balance and stimulate the overall coordination – also for children and teens with a disability.

Over the last couple of months we have been working on many exciting projects. We would like to present a small insight in our flyer "Necktwisters".

We hope you like it!

Do you have a great idea?

Just make a simple sketch. You'll be surprised how much fun it will bring you and how many of these ideas can actually be realized by us. The more ideas there are, the more play fun it will bring!

And then climbing – over and under!

Children are demanding dreamers.

They want to shape their spare time colourfull and exciting. A place where play elements distinguish themselves through design and play value and trigger children both big and small to play. In addition to our craftsmanship the use of high end materials ensure a long live span of our objects. This way children can enjoy their play world for a long time.

And complete playable worlds are discovered...

Everything in one hand.

Whether pirate World, Tabaluga village or Adventure parc – fantasy has no boundaries. Share your ideas with us, also regarding Indoor situations.

We will present a First concept, support you during the whole process and coordinate the realization. We put our soul in every project we realize and combine it with our knowledge and experience.
